KurzbeschreibungHow the Chinese look at themselves, the world, and the challenges of the future.Where is China,

What is China: Where are the traditional pigtailed of the old mandarins, the Maos bicycles and his suits? Where are the large families with the many concubines? The stuff that made China for centuries in all the stories Chinese and foreigners told of this huge country is gone. China now is skyscrapers, limousines, fast trains, science fiction airports, bright neon lights that explode in the night more than fireworks. Chinese are changing and have changed beyond recognition. In fact, they have changed so much that they do not see themselves in their present shape, just like an animal going through a metamorphosis. We are in the middle of this huge transformation and we dont know if and when the new shape will stabilize and what impact it will have on the conscience of the Chinese and of the people of the world looking at China. This book is an exploration into this huge revolution that is affecting the whole planet in the biggest way possibly since the fall of the Roman Empire.
