before purchasing it in order to gauge whether or not it would be worth my time, and all praised A Government of Wolves: The Emerging American Police State (English Edition):

Kundenrezensionen Hilfreichste Kundenrezensionen 1 von 1 Kunden fanden die folgende Rezension hilfreich. Frightening picture of the "police state" USA Von Customer The author presents in this book a lot of cases and

developments that show the decline of the police force from public servants to militarised tyrants. This includes the zero-tolerance policies at schools, the use of tasers to discipline people and the ever increasing use of SWAT teams for jobs formerly done by normal cops. The missing star is for some minor issues, e.g. GPS does not track anybody, and the alarmist conclusions.

Kurzbeschreibung In *A Government of Wolves: The Emerging American Police State*, John W. Whitehead charts America's transition from a society governed by "we the people" to a police state governed by the strong arm of the law. In such an environment, the law becomes yet another tool to oppress the people. As a constitutional attorney of national prominence, and as president of The Rutherford Institute, an international civil liberties organization, Whitehead has been at the forefront of the fight for civil liberties in this country. The recurring theme at the heart of *A Government of Wolves* is that the American people are in grave danger of losing their basic freedoms. The simple fact is that the Constitution - and in particular the Bill of Rights - is being undermined on virtually every front. Indeed, everything America was founded upon is in some way being challenged. The openness and freedom that were once the hallmarks of our society are now in peril. We were once a society that valued individual liberty and privacy. But in recent years we have turned into a culture that has quietly accepted surveillance cameras, police and drug-sniffing dogs in our children's schools, national databases that track our finances and activities, sneak-and-peek searches of our homes without our knowledge or consent, and anti-terrorism laws that turn average Americans into suspects. In short, America has become a lockdown nation, and we are all in danger. *A Government of Wolves* not only explains these acute problems but is a call to action offering timely and practical initiatives for Americans to take charge of present course of history and stop the growing police state. But time is running out. We are at critical juncture and every citizen who values his or her personal freedom needs to pay close attention to the message in this book!

Pressestimmen "John Whitehead is one of the most eloquent and knowledgeable defenders of liberty, and opponents of the growing American police state, writing today. I am pleased to recommend *A Government of Wolves* to anyone interested in learning how modern America increasingly resembles a dystopian science fiction film instead of a Constitutional Republic." -- Ron Paul, 12-term US Congressman and former Presidential candidate "I was privileged to have Duke Ellington as a mentor, who said of the jazz that was unsuccessfully banned in their countries by Stalin and Hitler: "The music is so free that many people say it is the only unhampered expression of complete freedom yet produced in this country." But only a basically free country could have produced back then such freedom of expression that has become so energizing a global presence. If we are to be again this free a nation, John Whitehead will have had a lot to do with our being able to swing again." -- Nat Hentoff, American historian and nationally syndicated columnist "The loss of liberty doesn't begin with invading armies, but with creeping government that slowly and almost imperceptibly invades our privacy with cameras, drones, wiretaps and monitoring of email communication. We are told this is for our own good. In this book, John Whitehead sounds a warning about overreaching government we had better heed before the point of no return has been reached." -- Cal Thomas, Syndicated and USA Today Columnist/Fox News Contributor "Where is Thomas Paine now that we need him? He's here just in the nick of time in the person of John Whitehead, an uncompromising debunker of lies, rhetoric mongers, rights-shredders and the criminal acts of our shameless, double-crossing government. Drop everything and read *A Government of Wolves* before it's too late! I loved and was horrified by this disturbing and courageous book!" -- David Dalton, New York Times bestselling author and a founding editor of Rolling Stone Magazine "A masterfully documented chronicle of frightened citizen vassalage to a Leviathan state in a hopes of a risk-free existence. An end to liberty is at hand." -- Bruce Fein, associate deputy attorney general under President Reagan and author of *American Empire Before The Fall* John Whitehead is one of the most eloquent and knowledgeable defenders of liberty, and opponents of the growing American police state, writing today.
