ReyesMy sincerest sympathy goes out to the brainless person who wrote the January 4 review entitled Acres of Hot Air. Conwell's book is only one of the greatest inspirational writings of all time, and is referred to by most of the other great inspirational writers such as Og Mandino and Norman Vincent Peale. The writer of the review (who fortunately, for him or herself, chose to remain anonymous) might want to think/read again, assuming the 62 pages won't be too taxing. I also don't think that any of us who are truly moving towards great success in this life (which is who the book is written for) will be impressed with the reviewer's choice of words which most of us will never (hopefully) use in real life. There is a curable disease called "status" which affects a large number of the middle to upper middle class in the USA today. It stands for "Still Too Arrogant To Understand

Success" As a recovering Status-a-holic myself, I know that the disease can be cured by reading and internalizing lessons such as the one in Conwell's book. The writer of "Acres of Hot Air" can begin his or her recovery by reading and thinking again.0 von 0 Kunden fanden die folgende Rezension hilfreich. a gemVon Larry HehnAcres of Diamonds is a lecture that Russell Conwell, founder of Temple University, delivered more than 6,000 times across the country. Through this lecture, Conwell debunks the idea that it is noble to be poor, an idea that far too many Christians share. He illustrates that it is our duty as Christians to use our gifts to honestly earn riches, because you can do more good with riches than without.Conwell successfully illustrates the difference between the popular expression "money is the root of all evil" and the complete Biblical passage which states "the love of money is the root of all evil". The love of money is idolatry, but money itself is neither good nor evil. It is simply a tool which may be used for either good or evil.In these pages we learn the virtues of earning money through honest, hard work. We learn to look for opportunities to serve others in our own back yard by simply finding a need and filling it. If you wish to be great, begin with who you are right now, where you are right now. Follow these principles, and you will uncover your own acres of diamonds.Larry Hehn, Author of Get the Prize: Nine Keys for a Life of Victory0 von 0 Kunden fanden die folgende Rezension hilfreich. Excellent book with practical ideas to succeed in businessVon Ein KundeSo much business wisdom in so little space. There are a number of short stories in this book, which will give anyone reading them excellent business advice. A lot these ideas are now being rediscovered by modern management.This book is also the seminal book for many of our modern "How to" succeed in business books. Mr Conwell's personal story is also extremely interesting and of merit. The funds from the lectures on which this book is based were used to found Temple University in Philadelphia. .
