KurzbeschreibungThis work is a comprehensive, heavily illustrated history of the many flying boats and amphibious aircraft designed and built in the United States. It is divided into three chronological sections: the early era (1912-1928), the golden era (1928-1945), and the post-war era (1945-present), with historical overviews of each period. Within each section, individual aircraft types are listed in alphabetical order by manufacturer or builder, with historical background, technical specifications, drawings, and one or more photographs. Appendices cover lesser known flying boat and amphibian types as well as various design concepts that never achieved the flying stage. **Pressestimmen**"an intriguing, easy-to-read work for all readers interested in aviation history. Highly recommended"--Choice ; "this nicely thought-out and very useful book presents almost 100 years of American-made or-designed craft that have the capability of operating from bodies of water. Photos are plentiful, quite well reproduced"--
