interacting with the unseen realm--drawing near to God, and waiting for Him to draw near. Loved it. 1 von 1 Kunden fanden die folgende Rezension hilfreich. Very Good!!! Von KB Very Good Read!! I liked this book very much. It is practical and biblically sound. Would recommend it for sure.

**Kurzbeschreibung** When my spiritual eyes first began to open several years ago, I realized something profound. Seeing in the spirit is not like turning on a TV, but rather like opening a door. As my spiritual sight began to increase my interaction with angels did as well. I soon realized how real and ever-present angels are in our lives. In my own life, Angels have given me gifts, told me to read certain scriptures, protected me and my family, shown their presence to encourage and strengthen us and given me warnings and instruction. Once this began to happen for me, it also began to happen for my family and soon even people who did not believe were seeing angels in our home. All through the Bible, our spiritual history shows that angels interacted with God's people and helped to bring about God's plan in their lives. Angels today do the same thing for all of us. We can choose to be aware of this and co-labor with Heaven intentionally. Angels are not hiding from us. If you choose to become aware of the Kingdom of Heaven, you will see the reality of it. This book contains a wide range of visitations from angels in my life and also many supernatural encounters of other kinds as well as miracles, signs and wonders. I encourage you that if you choose to read this book that the attitude of your heart should be "Yes Lord! I would like these things also!" God is no respecter of persons. Angels are real and we can acknowledge them and be aware of them if we choose! The Bible says that we should look upon the things that are unseen! (2 Cor. 4:18)
