Von Darrel Bigham : Evansville (Images of America) (English Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Evansville (Images of America) (English Edition):

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. A great little book that represents community life.Von Ein KundeA colleague and I did a similar book on Attleboro, MA. These books are great because they give patrons a glimpse of what their community looked like in days gone by. When all of the images are contained as they are in these books, they reveal new perspectives of community life across the country. For those who moved from the area it makes a great gift. In the community, it stimulates conversation about what was and what is. In Massachusetts and Rhode Island, many cities, towns and villages have Images of

America books in print.

KurzbeschreibungAs we approach a new century and a new millennium, we should consider how people in American communities dreamed about and participated in the coming of the twentieth century 100 years ago. The focus of this work is Evansville100 years ago the only emerging metropolis between Louisville and St. Louis, and then, as now, the radial center of a hinterland stretching in all directions from 75 to 125 miles. The book illustrates how the city landscape changed because of the early industrial era, how people made a living, how people related to each other, and how they spent their leisure time. About one-fifth of the images in this collection focus on the residents of the Evansville region; the Tri-State of southwestern Indiana, western Kentucky, and southern Illinois, which has been Evansville's service area since the 1850s.

AutorenkommentarFocus: Evansville at the turn of the last centuryI designed this book to go with a series of programs on , NBC Channel 14, that focus on the coming of the new millennium. The book attempts to convey images of this city and its region as it prepared for the 20th century. All the photos are from the period 1888-1910.
