Von AskBobRankin.com, Bob Rankin : Free Software: How to Save \$5000 on the Most Popular Software Titles (English Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Free Software: How to Save \$5000 on the Most Popular Software Titles (English Edition):

KundenrezensionenHilfreichste Kundenrezensionen1 von 1 Kunden fanden die folgende Rezension hilfreich. Fr die Software Laien OK, ansonsten nichts neuesVon demarcDa ich selbst Interesse an Software, PC/Lap/Smartphone Setups, Utilities, und sonstige Spielereien habe, wollte ich auch dieses viel beworbene Handbuch durchlesen. Nun, fr die Laien sind die Tipps OK, aber fr jemanden der sich ein bisschen auskennt oder fr jemanden der nicht scheue ist, im Netz ein wenig zu stbern, bringt es nichts Neues am Tageslicht. Wer kennt (noch) nicht die Open Office bzw. Libre Office, Mozilla, Thunderbird, Firefox ... und viele andere Open Source oder Portable (Apps) Programme? Dafr braucht man kein Buch. Immerhin, Bob hat es toll eingepackt und vermarktet, eigentlich aus trivialen Informationen (die JEDER der ein Mail bedienen und lesen kann auch selbst finden kann) ein Buch zu schreiben und das Buch auch zu verkaufen - alle Hochachtung - dafr die 4 Sterne.p.s. ich beginne mein Buch (mit dem anderen Set von trivialen Informationen) sofort zu schreiben :-)

KurzbeschreibungSoftware can be very expensive... but only if you make the mistake of buying it!Most computer users need a variety of software to handle tasks such as word processing, crunching numbers in a spreadsheet, handling their email, or managing personal finances. Other common activities include creating presentations, editing digital photos, updating a website, or installing security software.In this ebook, 30 of the most popular commercial software packages are listed, along with the retail price of each. If you were to purchase all of them, it would cost over \$5200.But most people don't know the valuable secret you're about to learn... there are excellent, FREE alternatives to ALL of these popular programs! If you're still paying big bucks for your software, you absolutely need this information.Here are some of the highlights that you'll discover:* FREE word processing software - compatible with Microsoft Word (save \$139)* FREE software to create images or retouch photos, with all the power of Adobe Photoshop (save \$649)* FREE Internet security software - the same anti-virus protection as Norton or McAfee (save \$69)* FREE presentation software - a powerful alternative to Powerpoint (save \$139)* FREE financial software - you'll kick yourself for buying Quicken or QuickBooks (save \$59)About the Author: Bob Rankin is a translator for the technology impaired -- a writer and computer programmer who enjoys exploring the Internet and explaining technology in plain English.His work has appeared in Computer World, NY Newsday, and other publications.KurzbeschreibungSoftware can be very expensive... but only if you make the mistake of buying it!Most computer users need a variety of software to handle tasks such as word processing, crunching numbers in a spreadsheet, handling their email, or managing personal finances.
